July 26, 2007(Replaces:October 15, 1992)

- Wiring harnesses consisting of an assembly of various numbers, sizes and types of Certified wire and/or flexible cord with or without integral devices such as terminals, special use connectors, special use attachment plugs, insulators and splices. Wiring harnesses may contain devices such as LEDs, resistors etc. not covered by Certification programs. Wiring harnesses designed and intended to be installed as components of specific end-product.
- Certified for use as components where the suitability is determined by the Canadian Standards Association.
- Connectors used in these harnesses are not for interrupting current.
